

Transform your *Employee Experience* Leverage the Power of EdCast's LXP in Salesforce

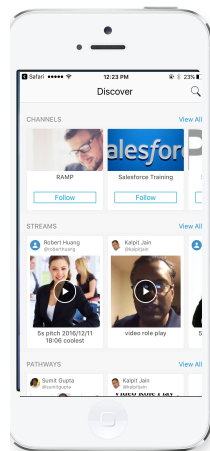

Using the EdCast LXP widget for Salesforce, you can deliver a world-class learning experience for your sales team.

Learners can access relevant, AI-powered training, onboarding and upskilling content quickly and seamlessly - all within an industry standard sales tool, Salesforce.

Learning in the flow of work means teams can ramp-up more quickly and are more productive. Information is readily accessible at the point of need.

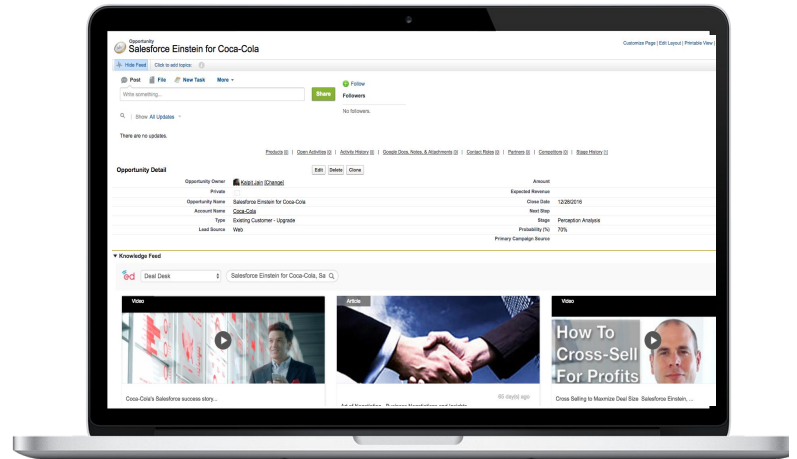

Content on the go

- Content to close the deal
- Content from SMEs
- Content from marketing
- Video content

Access your relevant learning content online or offline on any device with enterprise-grade security and an intuitive, learner-centric UI/UX.

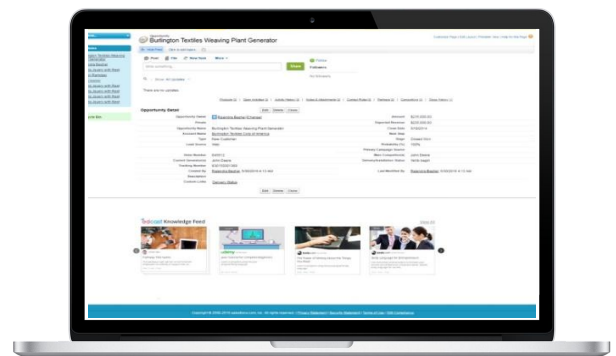

Single point of access to external content or content from your LMS or shared repositories (e.g., Box, Sharepoint). Enable subject matter experts to create and share content easily. Publish live streams and more with best-in-class creation tools.

Stay on track with learning goals without leaving Salesforce.

With our AI-powered knowledge cloud, you can create a unified index of all your content and provide contextual learning to the user in their flow of work.

Enable social sharing between peers and managers to quickly disperse knowledge within your organization. Allow partners and external users to access content on a shared platform featuring cohort-based experiences and micro-organizations.
