Designed for Learning Success.

The EdCast Learning Experience Platform includes the integration of SumTotal content for an even more robust learning journey.

Through **EdCast integration with SumTotal,** EdCast integrates with their content platform and builds a unified catalogue of learning content that is accessible through the LXP. The EdCast LXP uses Machine Learning (ML) to map content to a unified skills model and presents recommendations to learners based on their self-selected learning goals and skills.

SumTotal LMS provides seamlessly integrated access to corporate learning libraries and hosts learning paths, video- and non-video based courses and assessments.

Benefits Realized by the EdCast-SumTotal Integration:

Content Access and Search within EdCast

- Content is available as **Smartcards** in EdCast.

- Users can access content seamlessly by logging into their SSO-enabled EdCast account.

- Content search and navigation is very easy on EdCast LXP as it serves as an aggregated content platform.

- Smartcards can be:
  - Added to pathways and journeys
  - Posted to channels
  - Shared with other users and groups

- SumTotal content engagement data is displayed in EdGraph and in our data lake.

Content Synchronization

- Daily synchronization between SumTotal and EdCast.

- Synchronization includes:
  - Content
  - Assignments
  - Users' content completion

Content Assignment and Completion

- Daily synchronization of users' content assignment and completion including:
  - Content assigned to users
  - Name of specific items completed by users, date and time of completions
  - Transcript details
